## About me

As a back-end developer with a focus on Laravel, I have a deep understanding of web development principles and best practices. I have worked with front-end developers and designers to ensure seamless integration of front-end and back-end systems.

## Work Experience

**Senior Backend Developer** — **July 2025 - Present**

Ultra Wares/ Full Time

**My Responsibilities:**

- Develop and maintain RESTful APIs and backend services using Laravel.
- Design database schemas, relationships, and optimize queries for performance.
- Implement authentication, authorization, and data validation for secure applications.
- Collaborate with frontend developers and QA to ensure seamless integration and high-quality code
- Utilized version control systems (e.g., Git) to manage code repositories, track changes, and collaborate with team members.
- Managed version control and CI/CD pipelines using Git, GitLab CI/CD, and other DevOps tools.

**Senior Backend Developer** — **February 2024 - July 2025**

Madfox Solutions / Full Time

**My Responsibilities:**

- Developed and maintained microservices architecture using Python and Flask to support scalable and high-performance financial applications.
- Designed and implemented RESTful APIs for seamless integration with core banking systems.
- Worked on FinTech Studio, a composable middleware that centralizes banking data, manages APIs, and enables rapid product development without disrupting core operations.
- Implemented authentication, authorization, and security best practices to safeguard sensitive financial data.
- Integrated with third-party banking services and APIs to enhance system capabilities.
- Managed version control and CI/CD pipelines using Git, GitLab CI/CD, and other DevOps tools.

**Full Stack Developer** — **August 2023 - February 2024**

IXCoders / Full Time

**My Responsibilities:**

- Engaged in end-to-end web application development, spanning both front-end and back-end components.
- Developed robust server-side applications using PHP and the Laravel framework.
- Implemented RESTful APIs, database migrations, and authentication mechanisms.
- Designed and optimized database schemas using SQL for efficient data storage and retrieval.
- Created interactive and dynamic user interfaces using JavaScript and jQuery.
- Utilized version control systems (e.g., Git) to manage code repositories, track changes, and collaborate with team members.
- Actively participated in professional associations, technical communities, or online forums related to Laravel development, sharing knowledge and networking with fellow developers

**Back-End Developer**

3Miles / Full Time

**November 2022 - August 2023**

**My Responsibilities:**

- Developed and maintained web applications, ensuring high performance.
- Participated in Agile Scrum events, including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Designed and implemented RESTful APIs for front-end developers to.
- Collaborating with team members using version control and managing project timelines.
- Developed and implemented custom Bootstrap themes and plugins.
- Implemented authentication, authorization, and middleware for enhanced security and access control.

**Back-End Developer & Master Scrum**

Harbuk / Full Time

**October 2021 - November 2022**

**My Responsibilities:**

- Participated in Agile Scrum events, including sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Developed robust and scalable server-side applications using PHP and the Laravel framework.
- Worked extensively with Magento 2, customizing and extending its core functionalities to meet specific ecommerce requirements.
- Implemented RESTful APIs and web services to facilitate communication between the front-end and backend systems.
- Designed and optimized database schemas using MySQL for efficient data storage and retrieval.

## Education

**Bachelor of Electrical Engineering - Computer Engineering (74.69%)**
**Damascus University - Faculty of Mechanical & Electrical Engineering 2014-2020**

## Languages

**Arabic: Native**

**English: Proficient user (C1)**

## Projects

### Harbuk

A syrian full-stack e-commerce platform which provided an intuitive and user-friendly shopping experience for customers. Implemented features including product catalog management, shopping cart management and e-payment processing.

**Technologies:** Magento 2 - Laravel - Bootstrap - Web View

### Pyramind

A group-oriented TMS designed to manage projects across multiple companies and departments within the same group. unlike standard tools, it allows projects to be shared seamlessly between departments and companies, enabling cross-organizational collaboration and centralized task tracking.

**Technologies:** Laravel - Next JS
